On inhalation: None required, material not respirable

On skin contact: None required

On eye contact: Flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Medical aid on complaint.

On ingestion: Wash mouth out with water and let drink 1 to 2 glasses of water. Medical aid on complaint.

5.1 Extinguishing media:

Suitable extinguishing media: Carbon dioxide, water spray, foam and powder.

Unsuitable extinguishing

media for safety: Water jet.

5.2 Special hazards arising from the substance or mixture:

Specific hazards by product, Nonflammable solid, product will burn if heated. Decomposition gases and vapours, carbon combustion products or gases: monoxide and carbon dioxide, nitrogen oxide and hydrogen cyanide.

5.3. Advice for fire fighters:

Special protective equipment: Use pressure air respirator at low aeration and in closed rooms. On extreme conditions chemical protection suit might be necessary.

6. ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures:

In case of insufficient ventilation, wear suitable respiratory equipment

6.2 Environmental precautions:

Avoid release to the environment. Do not empty into drains.

6.3 Methods and material for containment and cleaning up:

Rinse the residues away with water. Incineration and disposal of the waste are to be according to local regulations.

Contaminated empty containers must be disposed as a chemical waste

6.4 Reference to other sections:

Refer to section 8 – personal protection, and section 13 – disposal considerations.

Technical measures: Not necessary, no exposition expected.

Personal protective equipment:

Body protection: Commonly special body protection not necessary, regular work clothing sufficient.
 Respiratory protection: Commonly respiratory protection not necessary.
 Eye protection: Commonly eye protection not necessary, eye contacts should be avoided.
 Hand protection: Protection gloves are not required commonly, on permanent skin contact gloves for low mechanic and substantial stress are enough. Protection gloves to be applied have to comply with the specifications of EU directive 89/686/EEC und EN 374, e.g. Matter: Butyl rubber Thickness: > 0,4 mm Penetration time: > 30 min.
 Skin protection: Skin protection products are not as effective as protection gloves, so suitable protection gloves should be preferred if possible. If protection gloves can not be worn apply water insoluble skin protection substances to clean skin before start of work and after each break and thoroughly embrocate. Before break and at end of work skin cleaning with water and soap is necessary. After cleaning fatty skin care products should be applied.
